

DATA SHEET

GUIDIND STICK ON/OFF CG

The AGMOV On/Off Guiding Stick is designed to direct loads safely, eliminating the risk of being pressed or cut while moving the load. **This model works with a permanent neodymium magnet and a trigger, which makes it easier to disconnect the pole from the load.** The magnet's force of attraction is 80 Pound Force. This model is suitable for working with loads up to a temperature of 80°C.

*Also use the "Vertical Handle" accessory (code: 271), for models over 5.0 ft (1,5 m), for even more comfort and ergonomics.

Magnet with 88 Pound Force
