

# DATA SHEET

## CARGO TIE LOAD HEAD

Devices

\*The strap is not included with the stick.

### Function

The Smart Cargo Tie-Load Strap Head promotes safety when tying down cargo, whether it is transported by road, rail, air or sea.

It is used to pull the lashing strap across the load, i.e. to throw the strap to the other side of the load where it will be anchored, without having to climb onto the truck or the load to do so, which eliminates the risk of falls and accidents.

As the hook is attached to the tip, there is no risk of it colliding with employees who may be at the other end of the load, making the activity even safer.

In addition, the Smart Cargo Lashing Tape End complies with NBR 15883 in item 3.1.14 Lashing Plan, which determines the "necessary measures to provide safety at all stages of the cargo transportation operation"

### Features

- Steel tip;
- aluminum pole body

### Models

The Smart Cargo Tie-Load Strap Head/  
Cód.: 2227

### Hs Code

8207.90.00

### Product Dimensions

Tape capacity of up to 1 ton.
