

DATA SHEET

ERGONOMIC LEVER

Devices

Function

The **Agmov Ergonomic Lever** was developed to help lift loads on the ground, such as manhole covers, concrete covers, metal railings and other loads weighing up to 180 kg.

Developed with an adjustable length and inclination stem, it can be adjusted to the most favorable position for the operator's height and the required load lifting height. To make it easier to transport, the equipment can be folded down to a length of 1.00 meters.

Accessories can be attached to the end pin, such as a chain sling, adjustable hook or magnetic lifter.

Features

- Carbon Steel 1020;
- Finished with electrostatic paint

Models/Codes/ Weight

Ergonomic Lever / Cod.: 3155/ 23 kg

HS CODE

8426.19.00

Product Dimensions
