GRIP HD - CONFORT

Devices

Function

The HD Confort Gripper Beacon Stick has been designed to meet the needs of operations where great precision is required.

With its specially designed gripper, it is ideal for picking up small parts, directing loads or removing the lifting device from the load, eliminating the risk of accidents when handling lifted loads. As part of the HD range, it is also highly recommended for more robust activities. Fully designed in partnership with a team of ergonomists, the idea is to make it even more comfortable for the operator to use their Hoist. With a specially designed angle, the wrist position changes, making it easier to pull the trigger.

Fetures

- Fabricado com alumínio Alloy;
- Molas galvanizadas;
- Pinça de alta precisão em aço;
- Manopla emborrachada;
- Acabamento feito com pintura eletrostática, na cor amarelo segurança.
